SUMMARY

Product Designer working across **native Android and iOS, PWA** and responsive web in fintech. I design money products people feel anxious about, so clarity and trust matter more than polish. **Talking to users** and **storyboarding** come before pixels; **design systems** and **interaction states** are where it gets built. **Over 300 production screens, over 100 user interviews, over 20 A/B experiments.**

EXPERIENCE

Product Designer

FREED India Pvt. Ltd.

Feb 2025 to Present

Gurgaon

India's first digital debt relief platform. **Sole product designer across 3 products**, partnering with **5 PMs** and engineering, designing for Tier 2 and Tier 3 users across literacy levels, languages and low end devices.

- Designed the **native Android and iOS app** end to end, from onboarding through to payment, covering navigation, core journeys and platform conventions on each OS.
- Designed the **PWA** and the journey that moves web users into the installed app, keeping the experience consistent across web, PWA and native.
- Designed **rewards and gamification** in the app, using streaks, progress and milestone moments to give users a reason to come back between payments and to lift **engagement and retention**.
- Redesigned the **onboarding and activation journey**, cutting friction where the data showed people dropping out. **Conversion moved from 8 percent to 10 percent.**
- Redesigned the **internal advisor tool**, restructuring a cluttered interface around how the team actually works through a call. **Saved 40 minutes per cycle.**
- Built and maintained the **design system** across 3 products using **components, variants and auto layout**, with interaction patterns and documentation, built for **accessibility** on low end devices.
- Ran **over 100 user interviews** and turned them into **journey maps, storyboards and personas** that set design direction.
- Ran **over 20 A/B tests and usability studies**, using **MoEngage** event data and **funnel analysis** to choose between design options.
- Shipped **over 300 production screens** with **annotated specs**, staying in the build through **QA** so what launched matched what was designed.
- Use **Claude and Lovable** to generate and pressure test flow variations, synthesise research and build clickable prototypes.

UX Designer

Creating Space.Studio

Sept 2024 to Feb 2025

Remote, Gurgaon

- Rebuilt an architecture firm's website around a new **information architecture**, adding a booking flow that turned a portfolio site into a working funnel.
- Designed a meditation app around the **user's emotional journey**, with **high fidelity prototypes** in **Figma** and calm, low stimulus **interaction patterns**.

UI and UX Design Intern

Flabs, IIT Roorkee startup

March 2024 to June 2024

Remote

- Redesigned the **SaaS** product website, running **usability tests** and iterating on what the sessions exposed.
- Ran **competitive analysis across 15+ products** and built **wireframes** in an engineering led environment.

Graphic Design Intern

Kreativ Street

June 2023 to Dec 2023

Remote, Gurgaon

- Designed banners, campaigns and infographics for multiple brands, building the **typography, layout** and **colour** fundamentals the product work rests on.

Product and Brand Designer

Freelance

Ongoing

- Brand identity systems** for XIBMS and SNDT College; **social media campaign design** for Travel Blue.
- Redesigned **Namdapha National Park's** digital presence for the **Govt. of Arunachal Pradesh**, design through deployment, with **accessibility** shaping the layout.

SKILLS

Craft	Interaction design, Information architecture, Wireframing, Prototyping, Interaction states, Responsive and multi device, Visual design, Accessibility
Research	Talking to users, User interviews, Journey mapping, Storyboarding, Personas, Usability studies, Problem framing
Systems	Design systems, Components, variants and auto layout, Interaction patterns, Documentation, Design to development handoff
Platforms	Native Android and iOS, PWA, Responsive web, Internal tools
Growth	Conversion, User engagement, User retention, Rewards and gamification, A/B testing, Funnel analysis, Data tracking, MoEngage
Tools	Figma, Sketch, Adobe Creative Suite, Framer, Webflow, GitHub, MoEngage
Emerging	AI assisted workflows, Claude, Lovable, Prompt engineering
Soft Skills	Stakeholder storytelling, Cross functional collaboration, Ownership, Empathy

EDUCATION

Bachelor of Arts in Economics	May 2021 to June 2024
Delhi University	Delhi
